The OMICADDY

The OMICADDY is the perfect working station for your protection tests.

Your test equipment becomes mobile in the substation and your desk adjustable to your preferred working height.

Your test objects are always in view and your work posture will be ergonomic and relaxed.

Your benefits

The OMICADDY is easy to handle:

- ✓ It fits in every trunk when collapsed.
- ✓ It can be carried with only one hand.
- ✓ It is fully set up in just a minute.

The OMICADDY facilitates your daily work:

- ✓ Test set, power supply and test leads can be affixed securely.
- ✓ The whole test set-up moves with you from field to field. No lifting or carrying.
- ✓ The working height is easily adjustable to the position of the protection relays.
- ✓ The compact test set-up is also ideal for testing in confined spaces like windmills.
